1.1. Introduction

The project team would like to welcome you to the Multimedia Guide for the museum of the Kykkos Monastery. This system has been developed for the fulfillment of the requirements to get the diploma of the Higher Technical Institute during the year 1999.

"Multimedia Guide for the Museum of Kykkos Monastery", is a multimedia and database package that will help people to learn background information about the Monastery of Kykkos, about the Holy Church and about the Museum. Furthermore, more detailed information about the exposed artifacts is available through a combination of pictures, texts, sounds (speech and music). This combination of multimedia facilities will make the package more user-friendly, easier to be understood and more interesting. The Multimedia Guide for the museum of the Kykkos Monastery has a bilingual aspect (greek and english) and it can be used not only for live presentation but for self-study as well.
