DEVELOPMENT OF A BEAUTY SALON SYSTEM

Manti Katerina

Project No.: CS/083

SUMMARY

The project deals with the development of an information system, and specifically with the **DEVELOPMENT OF A BEAUTY SALON SYSTEM**.

In order to provide the reader with the necessary understanding regarding the technique used in analyzing and developing an information system, a brief description of this process is given at an initial stage.

An extensive description of each of the major steps that comprise this process is given in separate chapters and is documented through the use of different forms, data flow diagrams and narratives.

The objectives of the project are:

- To develop a general purpose Beauty Salon System
- To provide an on-line facility for assisting the Beauty Salon's Diary Customer Services.
- To provide all necessary reports on screen or printer according to the user's specifications.
- To provide a variety of inquiries.
- To develop an accounting facility for Purchases and Sales of stock.
