1. Introducing the System

1.1 The system

Thank you, for using the Interactive guide for the city of Limassol. A useful tool providing a variety of information aiming tourists, businessmen as also the citizens of Limassol. The guide offers a state of the art interface using the latest trends in web design technologies. It is constructed in a way that your will not get your personal computer overloaded as all conventional multimedia productions did. The navigation through the system is performed by two ways, either by selecting the appropriate links or using the three buttoned controller referred to as Central Navigation System thus making easier the whole interaction. The system employs graphics, animations and a variety of audiovisual effects adding a sense of excitement to the users of the system.

1.2 How to use this manual

The manual gives in full detail and through illustration directions on how the Interactive guide can be used and aims in answering any questions that may rise through its use. The user must definitely refer to the part of the manual stating the requirements for the users computer system and the instructions on how to install the guide as a first step. Later on the user should read lightly the rest of the manual once in order to make proper use of the guide.
