ACKNOWLEDGMENTS

I would like to dedicate this project to my family and especially to my mother Athina and thank them for supporting me during the years I studied at the Higher Technical Institute.

My tutor Mr. Diomedes Lamprianides dedicated a lot of time and effort on this project. Not only he helped me to overcome difficulties I faced but he inspired me to see this project as a challenge for knowledge. For all this I am grateful.

I would like to extend my appreciation to two dear friends, Iacovos Rousos and Christos Kyprianou, for their help in a number of issues as well as for their friendship. Guys thank you for all.

Finally I would like to thank all the people that believed in me through the years and I hope that I have not disappointed them in any way.
