RESEARCH FOR WIND TURBINES AND CONSTRUCTION OF A SMALL ONE

By

Pavlou Andreas

Project Report

Submitted to the

Department Of Electrical Engineering

Of Higher Technical Institute

Nicosia Cyprus

In partial fulfillment of the requirements

For the diploma of

ELECTRICAL ENGINEERING

JUNE 2004

ACKNOWLEDGEMENTS

I would like to express my sincere thanks to my supervisor Mr. Georgiou Avraam, for his assistance and guidance throughout the project period.

I would like to express my thanks to the lab assistants of the Electrical Engineering Department, for their useful cooperation for the experiment, calculations and measurements of my project.

I would like also to express my thanks to Mr. Christo Maheridi and Mr. Christaki, for their useful cooperation and help for the construction, also that they let me use their machinery and tools for my construction and finally for helping me find the material I needed.

I would like to express my sincere thanks to my parents for their financial and moral support during my studies in the H.T.I. and especially I would like to express my thanks to my father who helped me and provide me with multimeter, for the need of an experiment I was doing and also with the bridge rectifier I used.

Finally I would like to express my thanks to my Johanna who supported me during the whole project period.

Pavlou Andreas

HIGHER TECHNICAL INSTITUTE
NICOSIA – CYPRUS
ELECTRICAL ENGINEERING DEPARTMENT
DIPLOMA PROJECT

2003 / 2004

Project Number: E.1349

Title:

Research for Wind Turbines and Construction of a Small One

Objectives:

- To make research and give information, for wind generators of all sizes
- To construct a small experimental wind generator

Student : Pavlou Andreas

Supervisor : Mr. Georgiou Abraam

External Assessor : Mr.

CONTENTS

ACKNOWLEDGEMENTS

TITLE-OBJECTIVES

	Page number:
1. Summary	1
2. Introduction	2
3. Wind Generator	4
3.1. What are the Wind Generators	4
3.2. Cost... Does It Worth	5
3.3. Characteristics of a Wind Generators	6
3.4. Different Wind Generator Types	7
4. Personal Experience	11
4.1. Aesthetic	16
4.2. Maintenance	16
5. Choosing Wind Turbine's Generator	18
6. Characteristics and Information of Dynamo	22
6.1. Construction of Dynamo	22
6.2. Specification and Calculations	24
6.3 Laboratory Experiment	25
7. Rectifier	29
8. The Shape and Aerodynamic of the Blades	31
8.1 Some Basic Aerodynamic Principles for the Blade	31
8.2 Designing the Blade for My Construction	34
8.3. Power Output of the Blades	38
9. Construction of the Base	40
10. Back Wing	43
11. Costing	45
12. Conclusion and Observations	46
13. References	47
14. Appendices	48
