CHAPTER 1

BEFORE YOU START

1.1 Introduction

Welcome to the Multimedia Computer Aided Instruction Software For System Analysis (ISFoSA)! After you have had this software installed on your hard disk, you will be able to start using the system by following the steps that are explained in section 1.5, 'Getting started'. The steps for the installation of the system are analytically explained in section 1.4, 'Installation of the system'.

1.2 What you need

In order to use the ISFoSA you need the following configuration:

Hardware:

- An Apple Macintosh Computer with a 68030 microprocessor or faster and at least 4MB RAM or higher
- At least 60MB hard disk
- A color 14" Apple monitor of high resolution
- An Apple 3.5" floppy disk drive
- An English keyboard with numeric keypad
- An Apple mouse
- A laser printer

Software:

- Hypercard Programming Language
- The ISFoSA program
- An Apple Operating System
