## 1. INTRODUCING THE SYSTEM

### 1.1 HOW TO USE THE MANUAL

As a primary purpose of the user manual is to help the user of the corresponding software system to understand and use it more easier. More over due to the structure that the manual is made of it provides the user with the capability to find any information the user needs for the various type of the process of the system through a quickly search and easily.

This manual is divided into categories. For each category we incorporate the details for each process.

It is very important to urge the user of this system that they start using the system. By this way the user will know afterwards in general which is the process of the system and use is more easily.

### 1.2 VERSION OF THE MANUAL

This version of the manual is the one that is based on the first version of the AIRLINE SALES PACKAGE system.
