ACKNOWLEDGMENTS

Firstly, I would like to express my gratitude to Mr. Th. Symeou, my project supervisor for his help and guidance.

I would also like to express my thanks to Ms E. Theopemptou (SEWARAGE BOARD OF NICOSIA), Mr. V. Mavroudes and N. Ioannou (WATER BOARD OF NICOSIA) for their valuable guidance in any information that I requested during the investigation procedure of work.

Special thanks are also given to my friend S. Maragos for his valuable assistance in all respects of my work.

Finally, I would like to thank everyone who gave me their help and advice.

ABSTRACT

The main target of this project is to help the reader understand the importance of water and the need for water conservation.

To achieve this, a study of a multistory building was carried out investigating water consumption and identifying areas where water conservation is possible. Then follows a proposal for the installation of a recycling system for the conservation of water in the building. An estimated cost analysis for the system is carried out so as to ascertain its viability.

List of Tables	iii
List of Figures	v
Abstract	viii
CHAPTER 1	
Introduction	1
1.1. The importance of water	1
1.2. Water Consumption in Cyprus	2
1.3. Conservation of water by wastewater treatment plants	3
1.4. Effluent qualities	4
CHAPTER 2	
Water Consumption	9
2.1. Introduction	9
2.2. Water Consumption in Nicosia	9
2.3. Consumption of water in Building	11
CHAPTER 3	
Sewage and water service system of the Building	37
3.1. Introduction	37
3.2. Water service system	37
3.3. Sewage system	39

CHAPTER 4

Water Conservation in Building 42
4.1. Introduction 42
4.2. Methods of water conservation 42

CHAPTER 5

Wastewater Treatment 49
5.1. Introduction 49
5.2. Wastewater characteristics and their
importance 50
5.3. Primary Treatment 55
5.4. Secondary Treatment 76
5.5. Tertiary Treatment 98
5.6. Wastewater treatment plant suggested for
"Marion Court" 105
5.7. Problems associated with small plants .. 109
5.8. Cost Analysis of the plant suggested.... 111
