ACKNOWLEDGEMENTS

I would like to express my sincere thanks to my project supervisor Mr. Avraam Georgiou for his guidance and valuable advice during the whole process of this project.

I would also like to thank anyone who has in any way helped me to complete this project.

ABSTRACT

This project deals with the design of electrical services of a multistory building.

The project work includes specifications and tender drawing as well as typical calculations of the design carried out.

The whole design is made according to the relevant for each system regulations.
