

**STATISTICAL PROCESS CONTROL
IN AN INDUSTRY**

**By
George Katsambas**

Project Report
Submitted to
The Department of Mechanical Engineering
of the Higher Technical Institute
Nicosia, Cyprus.

In partial fulfillment of the requirement
For the diploma of

TECHNICIAN ENGINEER
in
MECHANICAL ENGINEERING
M/900

JUNE 2000

HIGHER TECHNICAL INSTITUTE	PROJECT NO. 3188
----------------------------------	---------------------

To my parents for
tolerating me
for as long as they have

	<u>PAGES:</u>
TITLE	I
DEDICATION	II
CONTENTS	III
LIST OF FIGURES	VII
ACKNOWLEDGMENTS	IX
SUMMARY	X
CHAPTER 1: Introduction to the project	1
CHAPTER 2 :Importance and meaning of quality	3
2.1 Introduction to Quality	3
2.2 Definition of Quality	4
2.3 Historical overview	5
2.4 Meanings of Control	9
2.5 Definition of Quality Control	10
2.6 Implementation of Quality Control Policy	10
2.6.1 The quality Control Manager	11
2.6.2 Organization of the Quality Control Department	12
2.7 Definition of Quality Planning	12
2.7.1 Planning Sequence	12
2.8 What is Quality Management	13
2.8.1 What quality Management includes	13
2.8.2 Quality Management Objectives	14
2.9 Total Quality Management	14
2.9.1 Benefits of Studying TQM	15
2.9.2 TQM Components	16
CHAPTER 3: Introduction to ISO 9000	18
3.1 Introduction to ISO 9000	18
3.2 Structure	18
3.3 The concept of ISO 9000	19
3.4 The implementation of ISO 9000	19
3.5 What ISO standards exist	20

3.6	What do the other standards –9001 to 9003 correspond to.	21
3.7	Who is normally responsible for checking that a supplier conf.	22
3.8	Protection against false claims of ISO registration	22
3.9	Eight steps to ISO 9000 certification	22
CHAPTER 4: Introduction to Statistical Process Control (SPC)		24
4.1	Definition of S.P.C	24
4.1.1	How Statistical Process Control assistance can help you.	25
4.2	Uses of SPC	27
4.3	The seven 'tools' of SPC.	27
4.3.1	Pareto Chart	27
4.3.1.1	When to use a Pareto chart	29
4.3.1.2	Interpreting a Pareto chart	29
4.3.1.3	How to perform a Pareto analysis	30
4.3.2	Cause and effect diagram	32
4.3.2.1	Instruction to construct a Cause and effect diagram	32
4.3.3	Scatter Diagram	34
4.3.3.1	How to construct a Scatter diagram	34
4.3.3.2	When to use a Scatter diagram	36
4.3.4	Histograms	37
4.3.4.1	Creating a Histogram	37
4.3.5	Flow chart	38
4.3.5.1	step-by- step of how to develop a flow chart	41
4.3.5.2	Interpretation	41
4.3.6	Run charts	43
4.3.6.1	History	43
4.3.6.2	Steps in constructing a Run Chart	43
4.3.7	Control charts	45
4.3.7.1	History	45
4.3.7.2	Background Information	45
4.3.7.3	Uses of control charts	46
4.3.7.4	Analysis of pattern on control charts	46
4.4	Run Tests	48
CHAPTER 5: Introduction to the company		52
5.1	Charalambides Dairies Ltd.	52
5.2	History of the firm	53
5.3	Products of Charalambides Dairies.	53
5.4	Facilities – Equipments	54
5.5	Process involved throughout the manufacturing operation in firm	62
5.6	Charalambides Dairies in harmony with the nature	63
5.6.1	Wastewater	65
5.7	Quality Policies	65

CHAPTER 6: Quality control in Charalambides Dairies.	67
6.1 Inspection of products	67
6.1.1 Self inspection	68
6.2 Quality testing	69
6.2.1 Types of quality controls	70
6.3 Quality Planning	71
6.4 Defects and defectives	71
6.5 Suggestions for improving and implementing QC	72
6.6 Control Charts	75
6.7 Types of control charts	77
6.7.1 Control charts for variable data	77
6.7.2 Control charts for attribute data	79
6.8 How to construct a U, P and an \bar{X} - R chart	81
6.8.1 Steps in constructing a U chart	81
6.8.2 How to construct a P chart	82
6.8.3 Making an \bar{X} - R chart	83
6.8.3.1 Interpreting the chart	84
6.9 Process capability	85
6.9.1 Interpreting capability indices	86
6.10 Failure mode, effects and critically analysis	88
6.10.1 Difference between failure effect failure cause and mode	88
CHAPTER 7: Implementation of control charts	90
7.1 Manual implementation of SPC	90
7.1.1 Chart reference 1	90
7.1.1.1 Causes that affect process being in control	91
7.1.1.2 Actions that must be taken	92
7.1.2 Chart reference 2	94
7.1.2.1 The reasons that lead the process out of control are	94
7.1.2.2 Suggestions for improvement	94
7.2 Statistical process control with software	100
7.2.1 Implementation of SPC with the use of software	100
7.2.1 a) Sample temperature	101
7.2.1 b) Fat of raw milk	104
7.2.1 c) pH of raw milk	107
7.3 production statistics for Charalambides Dairies	110
7.3.2 1.0 whole	112
7.3.3 1 skim	112
7.3.4 Light milk	115
7.3.5 0.5 whole	115
7.3.6 0.5 skim	115
7.3.7 0.25 chocolate	119
7.3.8 0.25 banana	119
7.3.9 0.2 whole	119
7.3.10 1 cream	119

7.3.2	0.25 cream	124
7.3.3	Cheese	124
7.3.4	Milk cans	124
7.3.5	Cream can	128
7.3.6	Butter	128
7.4	Sales statistics	131
	Chart No.1 (1 ½ full milk)	131
	Chart No. 2 (1/1 full milk)	131
	Chart No. 3 (½ full milk)	134
	Chart No.4 (1/5 full milk)	134
	Chart No.5 (1/1 skim milk)	137
	Chart No. 6 (½ skim milk)	137
	Chart No. 7 (1/1 light milk)	140
	Chart No. 8 (1/2 chocolate milk)	140
	Chart No. 9 (¼ chocolate milk)	143
	Chart No. 10 (¼ banana milk)	143
	Chart No. 11 (1/1 fresh cream)	146
	Chart No. 12 (1/4 fresh cream)	146

CHAPTER 8 149

8.1	Setting up a steering committee for SPC	149
8.2	Extension of SOC in all areas- suppliers involvement	149
8.3	Operators input	149
8.4	Supervisors and operators training	150
8.5	Quality manual	150
8.6	Quality function deployment	150
8.7	Tagushi methods	151

CHAPTER 9 **Conclusions** 152

9.1	Personal benefits	152
9.2	Company's satisfaction	153

ACKNOWLEDGEMENTS

I would like to express my sincere appreciation to my supervisor, Dr. L. Lazaris Lecturer in the Mechanical Engineering Department of the Higher Technical Institute (H.T.I) for his valuable contribution and guidance during the preparation of this project.

Also I would like to thank Dr. Ioannis Iona Aggeli, laboratory assistance 1st class at the Marine and Mechanical Department for his help, advise and comments, generously given throughout this project.

I wish also to thank Mr. A. Aristodimou, Production Manager, Mrs' T. Georgiou, Chemic in Charalambides Dairies Ltd., for their helpful offered to me by providing me useful books and information relevant to the subject of the diploma project.

The main objectives of this project was to study in detail the theory on quality control, to investigate the quality control procedures and methods in a dairy industry and to suggest methods of improvement of the existing status. Also to carry out sampling measurements in order to test the effectiveness of the suggested techniques, by using various charts and measure the process capability of the process by variable data. Finally to carry out an economic comparison between the existing and the proposed quality control procedures and techniques. The whole content of the project is divided into 9 chapters.

SPC was implemented with the aim to assist in minimising variability by controlling the processes and consequently to achieve continuous product quality improvement.

It was introduced at the laboratory of the company and in the production as well.

Suggestions for improvement of the areas where the SPC was installed were included. The recommended improvements were expanded for the whole system of the industry.
