

STRENGTH ANALYSIS OF A
"CONCRETE-BLOCK - MAKING M/C"

Project Report Submitted by

STAVRIS EFSTATHIOS

In partial fulfilment of the requirements for the award of Diploma of Technician Engineer in MECHANICAL ENGINEERING of the Higher Technical Institute, CYPRUS.

Project Supervisor: Mr. C. Neocleous,
Lecturer in
Mechanical Engineering,
HTI

External Assessor: Mr. E. Kasianides

Type of project : Individual

JUNE 1989

OBJECTIVES OF THIS PROJECT

1. To identify all materials of construction of the m/c
2. To generate appropriate models for the estimation of stresses in each member
3. To find the minimum factor of safety
4. To present all calculations
5. To suggest improvements in the design.

CONTENTS

	page
1. STRENGTH ANALYSIS OF THE VIBRATION SYSTEM (DRG'S 1,2,3)	1-12
1.a Center of gravity of each cam	2
1.b Mass of each cam	2
1.c Estimation of the factor of safety of the camshaft	3
1.d Estimation of the bearing life	10
2. CALCULATION OF THE IMPACT FORCE	
3. STRENGTH ANALYSIS OF THE BASE OF THE SUPPORT OF THE MOULD (DRG 7)	14-23
3.1 Strength analysis of member 5	14
3.2 Strength analysis of member 1	15
3.3 Strength analysis of the small wheel	20
3.4 Strength analysis of the screw	21
3.5 Strength analysis of member 4	23
4. STRENGTH ANALYSIS OF THE SUPPORT OF THE MOULD (DRG 6)	
4.1 Strength analysis of member 9	24-32
4.2 Strength analysis of member 1	24
4.3 Strength analysis of member 3	28
4.4 Strength analysis of the screws	31
5. STRENGTH ANALYSIS OF THE MALE MOULD (DRG 11)	34-40
5.1 Strength analysis of members 2 or 3	33
5.2 Strength analysis of member 5	34
5.3 Strength analysis of member 1	35
5.4 Strength analysis of member 4	38
5.5 Strength analysis of the screws	39

6.	STRENGTH ANALYSIS OF THE FEMALE MOULD (DRG 5)	41-57
6.1	Strenght analysis of member 7	41
6.2	Strength analysis of member 6	45
6.3	Strength analysis of member 2	47
6.4	Strength analysis of member 1	46
6.5	Strength analysis of member 5	50
6.6	Strength analysis of member 11	56
6.7	Strength analysis of the screws-member 13	57
7.	STRENGTH ANALYSIS OF THE TWO SHAFTS-MEMBER 31 (DRG 4)	58
8.	STRENGTH ANALYSIS OF MEMBERS 16 (DRG 4)	62
9.	STRENGTH ANALYSIS OF MEMBER 9 (DRG 4)	63
10.	STRENGTH ANALYSIS OF THE HANDLE (DRG 8)	73-90
10.1	Strength analysis of member 2	76
10.2	Strength analysis of member 1	79
10.3	Strength analysis of the screws	84
10.4	Strength analysis of the pivot	90
11.	STRENGTH ANALYSIS OF MEMBER 4 (DRG 4)	91-102
11.A	When the moulds fall	91
11.B	When the female mould, male mould, and the support of the mould are raised	96
12.	STRENGTH ANALYSIS OF MEMBER 3 (DRG 4)	103-106
12.A	When the moulds fall	103
12.B	When the female mould, male mould and the support of the mould are raised	98
13.	STRENGTH ANALYSIS OF MEMBER 8 (DRG 4)	107-114
13.A	When the moulds fall	107
13.B	When the male mould in moved forward in order to fill the female mould with concrete.	

14.	STRENGTH ANALYSIS OF MEMBER 2 (DRG 4)	115-118
14.A	When the moulds fall	115
14.B	When the male mould is moved for in order to fill the female mould with concrete	
16.	STRENGTH ANALYSIS OF MEMBER 5 (DRG 4)	119-124
16.1	Strength analysis of member 18 (DRG 4)	124
17.	STRENGTH ANALYSIS OF MEMBER 1 (DRG 4)	125-135
17.A	When the moulds fall	125
17.B	When the female mould, male mould and the support of the mould are raised.	
18.	STRENGTH ANALYSIS OF MEMBER 22 (DRG 4)	136
19.	STRENGTH ANALYSIS OF THE WHEELS	138-145
19.A	FRONT WHEEL (DRG's 12, 17)	138
	Strength analysis of member 12 (DRG 4)	138
	Strength analysis of the pivot	140
19.B	REAR WHEEL (DRG's 13, 14, 15, 16)	143
	Strength analysis of the pivot	143
20.	STRENGTH ANALYSIS OF THE LOCKING DEVICE	146
21.	DESIGN OF THE WELDS	151
21.A	DESIGN OF THE WELD ON MEMBER 4	151
	IMPROVEMENTS IN THE DESIGN OF THE "CONCRETE - BLOCK - M/C"	155

APPENDIX
