INTRODUCTION

The development of the project lasted four months(AppendixB). During this period, we collected many archive documents, which we have scanned and processed them in acrobat writer. We have tried to process them in the best way and find the best resolution in order to be as readable as they could be.

In addition, we collected important information (working hours, address, e.t.c) for as many libraries as it was possible.

After studying the information, we followed an appropriate approach in order to design the web page with the best possible way.
