Project Number:M/495

Title:" Design and Operating Characteristics of Domestic Hot Water Boilers"

Objectives:

1. To conduct a thorough investigation into the design, constructional and operational features of the various domestic hot water boilers.
2. To describe with reference to drawings and diagrams a domestic hot water boiler stating the above features.
3. To prepare directions for the installation and adjustment of the boiler, the flue and the burner assembly.
4. To prepare preventive maintenance scheme for the boiler.

Terms and Conditions:

Assistance and Manuals will be provided.
