**June 1992**

## ACKNOWLEDGEMENTS

It is a great pleasure to us, to be offered the opportunity to express our thanks, appreciation and gratitude to all those people who have, in any way, offered us their most valuable help for the completion and presentation of our project, and in particular to the following:

- (a) Mr. K. Anastasiades project supervisor and lecturer in civil engineering at Higher Technical Institute.
- (b) Mrs. Emily Christou production manager of TSIRCON Co.
- (c) TSIRCON Co. for the supply of different materials
  - such as: (i) Spec-Cem
  - (ii) Tsirco poly 122 and 122L
  - (iii) Tsirco-res 201

e. t. c.

for carrying out the necessary tests.

Finally through this occasion thanks are expressed to those who have given us all the necessary guidance and help, and especially Niki Savva for helping us to wright the project.

## ABSRTACT

The object of the project was to give a general account for types of concrete failure, and also for materials used for the repair of reinforced concrete structures. Also during the project tests may be carried out for the different types of repair materials.

# Table of CONTENTS:

- 1.0.0. Introduction
  
- 2.0.0. Types of failure & damages suffered by concrete structures
  - 2.1.0. Damages occurring during construction
  - 2.2.0. Earthquakes
  - 2.3.0. Fire
  
- 3.0.0. Investigation and Diagnosis
  
- 4.0.0. Techniques for the repair of damaged concrete
  - 4.1.0. Repairs to cracked concrete
  - 4.2.0. Hand applied repairs
  - 4.3.0. Sprayed concrete
  - 4.4.0. Large-volume repairs
  
- 5.0.0. Materials used for the repair of damaged concrete structures
  
- 6.0.0. Tests on repair materials
  
- 7.0.0. Comments and conclusions carried out from tests
