## ACKNOWLEDGEMENTS

I would like to express my sincere thanks and appreciation to my Supervisors Dr. V. Messaritis and Mr. I. Angeli, lecturer and lab assistant respectively in the Mechanical Engineering Department at the Higher Technical Institute, for their valuable assistance and guidance throughout the project period.

Ioannides Nicolas  
3rd Year Student in  
Mechanical Engineering  
H.T.I

## ABSTRACT

The main objectives of this project are to study the programming characteristics of the Bridgeport IMK II (with TNC 155 Heidenhain control) CNC vertical milling machine and write part programs for the manufacture of two components. Part programs were written using linear interpolation, circular interpolation, canned cycles and subroutines. Detailed drawings of the components were produced.

ABSTRACT

	<u>Page</u>
CHAPTER 1	
1. Introduction	1
1.1 Definition of Numerical Control	1
1.2 N.C Applications	1
1.3 Advantages of N.C machines	2
1.4 Capabilities of N.C machines	2
CHAPTER 2	
2. Programming	4
2.1 N.C/C.N.C Machining	4
2.2 Input data	4
2.3 Part Programming and Programming Language	4
2.4 Preparatory and Miscellaneous functions	5
2.4.1 Preparatory functions	5
2.4.2 Miscellaneous functions	5
2.5 Positioning Control	6
2.5.1 Point to point positioning control	6
2.5.2 Continuous path control	6
2.6 Types of interpolation	7
2.6.1 Linear interpolation	7
2.6.2 Circular interpolation	8
2.7 Canned cycles	8
2.7.1 Classification of canned cycles	9
2.8 Methods of dimensioning	9
2.8.1 Absolute dimensions	9
2.8.2 Incremental dimensions	10

	<u>Page</u>
2.8.3 Advantages of absolute and incremental dimensions	10
2.9 Tool offsets	10
2.10 Workpiece and program zero point	10

### CHAPTER 3

3. Speeds and Feeds	12
3.1 Introduction	12
3.2 Importance of cutting conditions	12
3.3 Selecting the appropriate cutting conditions	13
3.4 Feed rate for milling	13

### CHAPTER 4

4. Bridgeport Interact Vertical Milling Machines	15
4.1 Introduction	15
4.2 Bridgeport's IMK II features	15
4.3 Bridgeport IMK II facilities	16
4.4 TNC 155 Heidenhein Control Features	18
4.5 Easy program checking	18

### CHAPTER 5

5. Component Manufacture	20
5.1 Familiarization with Manufacturing Component No. 1	20
5.2 Machining of Component No. 1	20

	<u>Page</u>
5.3 Familiarization with Manufacturing Component No. 2	29
5.4 Manufacturing of Component No. 2	29

#### CHAPTER 6

6. Fixture Design	58
6.1 Definition and purpose	58
6.2 Materials used in Jigs and Fixtures	58
6.3 Advantages of fixtures	59
6.4 Principles of Fixture Design	60
6.5 Fixture for Component No. 2	62

#### CHAPTER 7

7. Conclusions	63
7.1 General	63
7.2 Component Manufacture	63
7.3 Suggestions for Improvements	64
