4.7 Utilities	27

# CHAPTER 1

## INTRODUCTION

### **1.1 How to use this manual**

This manual offers help to the users, for solving any difficulties or problems that may arise during the operation of the HTI CS Labs system. Besides the analysis of the operational functions of the system, the manual provides instructions for system installation. A great deal of information along with system pictures (forms, reports, etc) is provided in order to explain every module in a logical sequence of operations. The user can find a solution to his problem by just searching the table of contents - at the beginning of this manual - for the appropriate topic. If the user does not find a satisfying solution to his problem, let him not forget that he is always able to contact the developer of the system (please do not hesitate), who is always at his disposal for any additional information.
