

COMPUTER SYSTEM FOR HOTEL RESERVATIONS

Project Number : CS/017

PROJECT REPORT SUBMITTED BY :

ANATOLITOU ANDROULA

IN PARTIAL FULFILLMENT OF THE REQUIREMENTS FOR
AWARD OF THE DIPLOMA IN COMPUTER STUDIES OF THE

HIGHER TECHNICAL INSTITUTE
NICOSIA
CYPRUS

Project Supervisor : Mr Christos Makarounas
BSc in Computer Studies

External Supervisor : Mr Marinos Stylianou
BSc, MSc in Computer
Studies

JUNE 1989.

SUMMARY

The computerized system for hotel front office was developed to satisfy the needs of a typical medium size hotel in Cyprus.

The hotel front office is viewed as the most important hotel activity which varies in its methods from one hotel to another but which has much in common in all of them. The purpose of this project was to identify problems with associated with the functions of the front office and to try and solve these problems by replacing them with computerized functions.

The functions of the front office that should be covered with this project are only the reservations and the recording of guests information.

The approach followed for the analysis and development of the project is the systems development life cycle which is discussed in a later chapter.

As a conclusion I submit this project with the belief that I have presented a good solution.

TABLE OF CONTENTS

ACKNOWLEDGMENTS.....	1
SUMMARY.....	2
INTRODUCTION.....	3
1. THE SYSTEMS DEVELOPMENT LIFE CYCLE.....	4
2. INITIAL INVESTIGATION PHASE	
2.1 Initial Investigation.....	6
2.1.1 Introduction.....	6
2.1.2 User Request.....	6
2.1.3 Methods of gathering information.....	6
2.1.4 Statements of Systems objectives.....	7
2.1.5 Description of existing procedures.....	7
2.1.6 Manual Data files.....	10
2.1.7 Problems of the existing system.....	11
2.1.8 Possible solution options.....	12
2.1.9 Recommended Solution	12
2.1.10 Conclusion.....	13
2.2 Feasibility Study	
2.2.1 Introduction.....	14
2.2.2 Schedule Feasibility.....	14
2.2.3 Operational Feasibility.....	14
2.2.4 Human Factors Feasibility.....	14
2.2.5 Technical Feasibility.....	15
2.2.6 Financial Feasibility.....	16
2.2.6.1 Costs.....	16
2.2.6.2 Benefits.....	17
2.2.6.3 Cost and Benefit Analysis.....	18
2.2.7 Project Feasibility.....	19
3. ANALYSIS AND GENERAL DESIGN PHASE	
3.1 Existing System Review.....	20
3.1.1 Introduction.....	20
3.1.2 Organization.....	21
3.1.3 Diagrams of the existing system.....	21
3.1.4 Data Files.....	22
3.1.5 Current System Inputs.....	22
3.1.6 Current System Outputs.....	23
3.2 New System Requirements.....	24
3.2.1 Introduction.....	24
3.2.2 Overview Narrative.....	24

3.2.3	System Function.....	24
3.2.4	Processing.....	25
3.2.5	Process Descriptions.....	29
3.2.6	Outputs for the user.....	33
3.2.7	Inputs to the system.....	33
3.2.8	User Interfaces with the system.....	33
3.3	New System Design.....	34
3.3.1	Introduction.....	34
3.3.2	Computer Processing	34
3.3.3	Outputs to the user.....	34
3.3.4	Inputs to the user.....	35
3.3.5	Data Files.....	35
3.3.6	Performance Criteria.....	38
3.3.7	Access Control.....	38
3.3.8	Security.....	38
3.3.9	System Hardware Requirements.....	39
3.4	Implementation and Installation Planning...40	
3.4.1	Introduction.....	40
3.4.2	Preliminary Detailed Design and Implementation Plan.....	40
3.4.3	Preliminary System Test Plan.....	40
3.4.4	User Training Outline.....	41
3.4.5	Preliminary Installation Plan.....	41

4. DETAILED DESIGN AND IMPLEMENTATION PHASE

4.1	Technical Design.....	43
4.1.1	Human Machine Interface.....	43
4.1.2	File Design.....	44
4.1.3	Software Design.....	44
4.2	Test Specification and Planning.....	44
4.3	Programming and Testing.....	45
4.4	User Training.....	45
4.5	System Test.....	46

5. CONCLUSION

5.1	General Review of the new system.....	47
5.2	Future Enhancements.....	47

APPENDICES

- A. DATA DICTIONARY
- B. DATA FLOW DIAGRAMS
- C. SYSTEM FLOWCHARTS
