

1

DEVELOPMENT OF AN EPROM CONTROLLED
WAVEFORM GENERATOR

Project report submitted by

PIRILLOS P. CHRISTOFOROS

to
the Department of Electrical Engineering
of the
Higher Technical Institute
Nicosia, Cyprus

in partial fulfillment of the requirements
for the Diploma of

TECHNICIAN ENGINEER

in

ELECTRICAL ENGINEERING

JUNE 1991

ACKNOWLEDGMENTS

I would like to express my gratitude to my supervisor Mr.Hadjioannou for his valuable help and assistance for the completion of this project.This project would have been a long distance dream without his help.

I would like also to express my thanks to my friend and colleague Mr.Leonidas Embedoklis for his moral support throught out the preparation of this project.

ABSTRACT

Eprom Contolled Waveform Generator

by Pirillos P. Christoforos

The purpose of this project is to design,construct and test a waveform generator.

The generator,unlike usual approaches,is based on a pulse counting system which is an experimental approach.

An Eprom converts the counter outputs into a proper digital number and this number is then converted into an analogue waveform by a digital to analogue converter.The output can be of four types:

- a)Sine wave
- b)Square wave
- c)Triangular wave
- d)Saw-tooth wave

The output of the D/A converter is buffered so as to have a more stable output.There are three additional controls:

- a)Variable frequency.
- b)Variable Gain
- c)DC offset

The scope of the first two is obvious.The DC offset moves the waveform up and down the axis i.e.DC or AC.

At the end of the project some improvements are given to increase the output frequency range and to provide some other useful controls.

CONTENTS

	<u>page</u>
ACKNOWLEDGMENTS.....	1
ABSTRACT.....	2
INTRODUCTION.....	3
CHAPTER 1: WAVEFORM GENERATORS	
1.1 General.....	4
1.1.1 Audio Frequency generators.....	4
1.1.2 Radio Frequency generators.....	5
1.1.3 Pulse generators.....	5
1.1.4 Function generators.....	5
CHAPTER 2: OPERATION OF THE WAVEFORM GENERATOR	
2.1 Principle of operation.....	6
2.2 Operation.....	6
2.3 Block diagram.....	7
CHAPTER 3: CIRCUIT DESIGN AND OPERATION	
3.1 General.....	9
3.2 The clock.....	9
3.3 The counters.....	12
3.3.1 The binary ripple counters.....	12
3.4 The Eprom.....	15
3.5 Waveform manipulation.....	17
3.5.1 The Digital to Analogue converter.....	17
3.5.2 The Operating Amplifier.....	20
3.6 The Power Supply.....	23
3.7 Protection against spikes.....	25
3.8 Complete circuit diagram of device.....	26

CHAPTER 4: DATA STORED IN EPROM

4.1	Data creation.....	27
4.2	Sinewave.....	27
4.3	Triangular Wave.....	27
4.4	Square Wave.....	28
4.5	Saw-tooth Wave.....	28

CHAPTER 5: TESTING AND TROUBLESHOOTING

5.1	Testing.....	29
5.2	Troubleshooting.....	31

CHAPTER 6: SUGGESTIONS AND IMPROVEMENTS

6.1	General.....	33
6.2	Improvements.....	33

CONCLUSION.....	35
