

PLANNING OF THE TELEPHONE DISTRIBUTION  
IN A HOTEL AND ASSOCIATED  
HOTEL APARTMENTS

Project Report Submitted by

ELEFThERIA VRAHIMI

E - 658

in part satisfaction of the award of Diploma of  
Technician Engineer in Electrical Engineering of  
the Higher Technical Institute, Cyprus

Project Supervisor: Mr. C. Loizou  
Senior Lecturer in  
Electrical Engineering, H.T.I.

External Assessors: Mr. S. Joakim  
Head of Planning - Line Plant  
Cyprus Telecommunications Authority

Type of Project : Individual

Group

June, 1989

## ABSTRACT

This project deals with the telephone distribution in Hotel Apartments.

CHAPTER 1: Deals with the external distribution study. It gives information about CY.T.A.'s regulations and also describes materials and equipment used.

CHAPTER 2: Deals with the internal distribution network. It gives a brief explanation of the terms used and refers to the relevant regulations of CY.T.A.

CHAPTER 3: Deals with the different types of earthing employed by CY.T.A.

CHAPTER 4: Deals with the private communication systems. It gives information about the various types available, their installation, operation and facilities offered.

CHAPTER 5: Deals with the work on site it explains how the manual work should be done.

CHAPTER 6: Deals with the actual design and explains the process to be followed to complete a telephone distribution study. It also refers to the planning of the telephone distribution of RITSA and ANTONELLA HOTEL APARTMENTS.

CHAPTER 7: Deals with the estimate of work of the internal as well as the external network of the Hotel Apartments.

CHAPTER 8: Refers to the end results and conclusions drawn from the actual design of the project study.

Abstract	
Introduction	
CHAPTER 1 - EXTERNAL DISTRIBUTION NETWORK	
1.1 - Introduction	1.1
1.2 - External line plant	1.2
1.3 - The cabinet and pillar system	1.3
1.3.1 - Construction of cabinets	1.6
1.4 - Basic principles for the smooth operation of a telephone exchange.	1.8
1.5 - Interference from power lines on telephone lines	1.9
1.6 - Joint-pits, Manholes	1.10
1.7 - Ducts	1.11
1.8 - Asbestos-Cement Ducts	1.11
1.9 - Polythene Ducts (PVC)	1.12
1.10 - Plastic conduits	1.12
1.11 - Main types of cables	1.12
1.11.1 - Polyethelene twin cables (PET)	1.13
1.11.2 - Polyethelene twin unit cables (PEUT)	1.14
1.12 - Polythene insulated cables	1.15
1.13 - Poles-Overhead network	1.15
CHAPTER 2. - INTERNAL DISTRIBUTION NETWORK	
2.1 - Definitions of the terms used	2.1
2.2 - Basic principles governing the internal telecommunication network	2.4
2.3 - Installation of access cable	2.7
2.4 - Installation of the conduit network	2.10
2.4.1 - Conduits and conduit sizes	2.11
2.5 - Installation of the distribution cases	2.12
2.6 - Installation of telephone lines	2.15
2.6.1 - Separation from electrical circuits	2.15
2.7 - Positioning of telephone sets	2.17

CHAPTER 3	- EARTHING	
3.1	- Protection earth	3.1
3.1.1	- Protection from lightning surges	3.1
3.2	- Operational earth	3.2
3.3	- Special earth for EPABX's	3.2
CHAPTER 4	- PRIVATE COMMUNICATION SYSTEMS	
4.1	- Private manual branch exchange	4.1
4.2	- Private automatic branch exchange	4.1
4.3	- Electronic private automatic branch exchange	4.2
4.3.1	- Types of EPABX's	4.2
4.3.2	- Facilities offered by the Telic 2506 8/24 and 24/120 EPABX's	4.3
4.4	- Plan telephone	4.6
4.4.1	- The external plan telephone	4.6
4.4.2	- The internal plan telephone	4.6
4.5	- Parallel telephones	4.7
4.6	- Plug and sockets method	4.7
4.7	- Key systems	4.10
4.7.1	- General	4.10
4.7.2	- Description of units	4.10
4.7.3	- Internal communication	4.10
4.7.4	- External communication	4.11
4.7.5	- Restrictions	4.11
4.7.6	- Available systems	4.11
4.7.7	- Installation	4.12
4.8	- Telephone system T16	4.14
4.8.1	- General	4.14
4.8.2	- Features offered	4.14
4.8.3	- Installation of T16	4.16
CHAPTER 5	- WORK ON SITE	
5.1	- General	5.1
5.2	- Delivery and storage	5.1
5.3	- Central equipment	5.1
5.4	- Surface wiring	5.1
5.5	- Wiring	5.2

CHAPTER 6	- DESIGN OF THE INTERNAL WIRING FOR RITSA AND ANTONELLA HOTEL APARTMENTS	
6.1	- Complete design submitted to CY.T.A.	6.1
6.2	- Preliminary considerations	6.1
6.3	- Procedure to be followed to plan an internal wiring	6.2
6.3.1	- Practical notes about the design	6.2
6.3.2	- Connection of the Hotels with tie-lines	6.3
6.4	- Conduit schematic consideration	6.3
6.4.1	- Typical calculations for the selection of conduit size	6.4
6.5.1	- Information obtained from the conduit and wiring diagrams	6.5
6.5.2	- Information obtained from the list of connections	6.5
6.6	- Actual design of external line plant	6.5
6.6.1	- Selection of capacity of access cable	6.5
6.6.2	- Selection of diameter for the access cable	6.6
6.6.3	- Underground cabling and duct route considerations	6.7
6.6.4	- Selection of size of joint-pits	6.10
6.6.5	- Selection of conduit sizes for the underground cables	6.10

CHAPTER 7 - ESTIMATE OF WORK
