1. Introducing the system

Welcome to the first version of this multimedia aided Learning tool for computer fundamentals. This tool has been developed in order to present the computer basics and facts in an interactive, attractive, and fully functional package.

The main purpose of this user manual is to guide the user on how to use the system as well as offer them any needed help regarding the different features, buttons that the system provides.

1.1 How to use this manual

This manual will guide you through a step-by step procedure that will allow you to encompass and understand the functionality of the system starting from what you need in order to run the system down to describing how it actually works.
