HIGHER TECHNICAL INSTITUTE	PROJECT NO 3811
----------------------------------	--------------------

SUMMARY

My project is a Website of a Basketball Club and it was suggested by my lecturers in the Higher Technical Institute as a final project in the department of Computer Studies. It was my first choice and my lectures accepted it.

The whole idea of the system is to make the user able to find any information he wish about a basketball club, club's history, videos and photo gallery from past matches, player records and statistics, games and practice scheduler and have the ability to become a member. Also the website will consist of employee login, payroll, member dues, accounts payables and receivable and club's equipment inventory.

I decided that my Website will be dedicated to "ACHILLEAS AGROU", the basketball club of my village.
