# DESIGN OF A FLEXIBLE MANUFACTURING CELL

BY

#### **COSTAS HADJIKYRIACOU**

PROJECT REPORT SUBMITTED TO

### THE DEPARTMENT OF MECHANICAL ENGINEERING

# OF THE HIGHER TECHNICAL INSTITUTE NICOSIA - CYPRUS

## IN PARTIAL FULLFILMENT OF THE REQUIREMENT FOR THE DIPLOMA OF

**TECHNICIAN ENGINEER** 

IN MECHANICAL ENGINEERING (M 573)

JUNE 1991

HIGHER TECHNICAL

INSTITUTE

#### **ORGANIZATION OF THE PROJECT**

The project is organized into two parts.

Part one consists of two chapters of which the first chapter is an introduction chapter attempting to whet the readers appetite for the chapter that follow.

Chapter two of the first part consists of four section through which the reader can optain an idea about those concepts and techologies that led to the idea of F.M.S.

Part two consists of one chapter subdivided into four section. In this part efforts is given towards the design of an F.M.S. cell. In the four section the following analysies were carried out:

- 1. Analysis as far as hardware needs are concerned.
- 2. Analysis as far as software needs are concerned along with discussion on dynamic scheduling and off line simulations.
- 3.
- Analysis of network needs (F.M.S. layout configurations)

### CONTENTS

PART	<b>1</b> 1		
1.	INTRODUCTION TO F.M.S.		1
	1.1.	What is F.M.S.	
		Basic patterns and ideas	
	1.2.	Application and positioning of the F.M.S.	4
	1.3.	Benefits in using the F.M.S.	6
2.	BASIC	C CONCEPTS AND TECHNOLOGIES CONCERNING THE F.M.S.	
	Introd	uction	
	2.1.	Automations	8
	2.2.	Automated Material Handling	11
	2.3.	C.N.C. D.N.C. approach to F.M.S.	29
	2.4.	Group Technology	33
PART	2		
3	INTR	ODUCTION	39
	3.1.	Selection of Components/Calculations	40
	3.2.	Description/Analysis of Hardware	43
	3.3.	Analysis of Software Requirements	47
	3.4.	F.M.S. Layout Configuration	52
CONC	CLUSIC	DNS/DISCUSSION/FUTURE TRENDS IN FMS	54
