

ENVIRONMENTAL IMPACT ANALYSIS

BY

ANNA YIANNAKOU

PROJECT REPORT

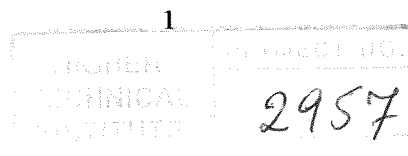

Submitted to
the Department of Civil Engineering
of the Higher Technical Institute
Nicosia Cyprus
in partial fulfillment of requirements
for the diploma of

TECHNICIAN ENGINEER

in

CIVIL ENGINEERING

June 1999

SUMMARY

The purpose of this project was to study the effect of the development of highway. The objective of this study was to state general principles followed in the preparation and presentation of an environmental impact study. Also, to state and analyse general environmental problems created due to highways. Furthermore, the objectives were to state general principles in the analysis of environmental impact study due to highways and finally to present an environmental study resulting from highways.

Chapter 1 analyse the general environmental problems resulting from the construction of a highway.

Chapter 2 analyse some legislations and the way of control of those problems resulting from the highway.

Chapter 3 presents an environmental impact study resulting from Dekeleia-Xylofagou-Protaras Road.

The Appendix 1 describes the different legislations that exist.
