HIGHER TECHNICAL INSTITUTE	PROJECT NO
	3673

ABSTRACT

The main objectives of this project was to implement statistical approaches and to install an Automatic Number Plate Recognition (A.N.P.R.) system in an automated car wash station located in Strovolos, Nicosia, Cyprus.

The first part of the project was to study the existing system of the company under investigation.

Several control charts were developed, presented and discussed, including the following:

- The number of cars entering the station using the three years past data and the collected data during our stay in Cyprus
- The time for prewash and the total washing time
- The time for manual activities after washing the cars in all five gates
- The actual time per each activity (for cleaning the glasses, the interior, the exterior and the carpets)
- Pareto analysing for car types
- Scatter diagrams for interaction between humidity and incoming cars

This statistical analysis is expected to improve the efficiency and the output of the workers and Carecar Ltd.

The second part of the project was to study, select, order and install a License Plate Recognition system. The system was succesfully installed (with two cameras working) at a recognition rate of 95 %. The system will enable the company to know how many cars are getting to the station, the service time and the license number.

All those stored information will help the company to implement a customer oriented fidelity program in Carecar Ltd.

**To our families
for providing all the support and keeping us in the
right track**

CHAPTER 1	1
INTRODUCTION TO THE PROJECT	
1.1 OBJECTIVES OF THE PROJECT	1
1.2 METHODOLOGY	1
1.3 STRUCTURE OF THE TRAINING COURSE'S REPORT	2
CHAPTER 2	3
INTRODUCTION TO DATA ACQUISITION AND STATISTICAL ANALYSIS	
2.1 THE L.P.R SYSTEM	3
2.1.1 Presentation of the system	3
2.1.2 Configuration and characteristics of the various components	4
2.1.3 Process of the plate's recognition	5
2.1.4 Conditions of acquisition and precision of measurements	7
2.1.4.1 Conditions of acquisition	7
2.1.4.2 Precision rate of the measurements	8
2.2 STATISTICAL TOOLS AND ANALYSIS	10
2.1.1. What is statistics ?	10
2.1.2. Historical of statistics	11
2.2.3. Some properties of statistics	12
2.2.3.1. Statistical vocabulary	12
2.2.3.2. Discrete variables	12
2.2.3.3 Continuous variables	14
2.2.4. Utility in the project – Utilisation of the Statistical Process Control (S.P.C.) tool and Excel software	15
CHAPTER 3	18
THE COMPANY UNDER INVESTIGATION CARECAR LTD.	

3.1 GENERAL INFORMATION	18
3.2 HIERARCHY	19
3.3.1 In the queue	22
3.3.2 The prewash	22
3.3.3 Entry in the automat	24
3.3.4 Activities after the exit of the automat	27
3.3.5 Other services	29
3.4 OBJECTIVES OF THE COMPANY	29
CHAPTER 4	30
METHODOLOGY ADOPTED	
CHAPTER 5	38
DATA ANALYSIS AND RESULTS PRESENTATION	
5.1 INTRODUCTION	38
5.2 LIST OF GRAPHS	38
5.2.1 Number of cars – Data from 2004 to 2006	38
5.2.2 Number of cars for nine days	38
5.2.3 Time for prewash and total washing time	39
5.2.4 Washing time by the employees	39
5.2.5 Time for activities	39
5.3 METHODOLOGY OF PRESENTING THE GRAPHS AND THE RESULTS	40
5.4 PRESENTATION OF THE RESULTS	40
5.4.1 Number of cars per day	40
5.4.2 Number of cars per week	41
5.4.3 Number of cars per week according to the year	42
5.4.4 Number of cars per day and per week vs rainfull	43
5.4.5 Number of cars daily and weekly when rain	44
5.4.6 Number of cars according to the type of vehicle	46
5.4.7 Number of saloon cars per day	47
5.4.8 Number of big cars per day	48
5.4.9 Time for prewash	49
5.4.10 Total time for wash	50
5.4.11 Time for prewash and total washing time with created regions	51
5.4.12 Time for after wash activities for saloon cars	52
5.4.13 Time for after wash activities for big cars	53
5.4.14 Time for after wash activities for outside washing	54
5.4.15 Time for after wash activities for saloon cars according to the type	54
5.4.16 Time for after wash activities for big cars according to the gate	62
5.4.17 Time for activities	65
5.5 CONCLUSIONS	68
5.5.1 Number of cars – Data from 2004 to 2006	68
5.5.2 Number of cars for nine days	68
5.5.3 Time for prewash and total washing time	68
5.5.4 Washing time by the employees	68

5.5.5 Time for activities	69
