

COMPUTER AIDED DESIGN OF 11 KV DISTRIBUTION LINES

Project report submitted by

YIANNOURAS IOANNIS

in part satisfaction of the
award of diploma of
Technician Engineer in
Electrical Engineering of
the Higher Technical Institute
Nicosia - Cyprus

Project Supervisor: Mr. Ch. Crysafiades
Lecturer in Electrical Engineering Department at HTI

External Assessor: Mr. Venizelos Eftymiou Electricity Authority of Cyprus

June 1995

ACKNOWLEDGEMENTS

I would like to express my sincere thanks to Mr Ch. Chrysafiades and Mr V. Efthymiou for their help and assistance in order to complete this project.

I would also like to thank all the staff of Electricity Authority of Cyprus for their cooperation during my training in E.A.C. and especially George Stavrou for his help in all the ways.

In the end I would like to thank Alexia for the typing and printing of this project.

ABSTRACT

The project deals with the designing of 11 KV overhead distribution lines, and the methods used in Electricity Authority of Cyprus.

To get familiar with the subject I followed the whole procedure of the designing.

During my training in E.A.C. I attended actual survey work in the fields, I worked in the designing office and practised in designing of distribution lines using a fully computerized procedure on the E.A.C's computers.
