Restoration of an old house

by: Chrysostomos Loizou

Since I bought my car three years ago I was always touring in the roads of the old inside the walls Nicosia and in the old neighbourhoods of Strovolos.

Looking at the old houses, the old churches and other old buildings I was thinking how important is the restoration process to keep alive our tradition and character.

When the "project time" came I decided to propose my idea of doing a project dealing with the Restoration of an old house. My idea was accepted.

Days later I found this old house in the old neighbourhood of Strovolos. I investigated the past and the present of the house and I detected the problems and I proposed some ideas for Restoration.

Photographs, measured drawings, a list of materials that might be used for restoration are submitted in the following chapters.

The house was build 86 years ago and if it is restored according to my proposed ideas it will last a considerable time keeping it's character and our tradition intact and alive.

Abstract

<u>Contents</u>	<u>Page</u>
Introduction	1
Chapter 1: The house	2
1.1 Social, religious and historical background of the house	5
Chapter 2: Architecture through the centuries	11
2.1 Prehistoric Architecture	12
2.2 Ancient Architecture and the Western succession	14
2.3 19th & 20th century architecture in Europe	15
2.4 Le Corbusier	15
2.5 Gothic architecture and the house	16
Chapter 3: Restoration: Problems and Solutions	19
3.1 General restoration	21
3.2 External walls	22

3.2.1	Problems of the North and West sides	22
3.2.2	Problems of the east side	24
3.2.3	North and West sides Remedies	25
3.2.4	East side Remedy	27
3.2.5	Common Problems and their solution	28
3.3	Internal walls	28
3.3.1	Problems of the internal walls	29
3.3.2	Restoration process for the internal walls	29
3.4	The floor	31
3.4.1	Generally	31
3.4.2	Remedy for the floor area	33
3.4.3	Additional proposal	34
3.5	The doors and windows	35
3.5.1	Problems of the timber structures	35
3.5.2	Proposed restoration process	37
3.5.2.1	internal windows and doors	37
3.5.2.2	external windows and doors	42
3.6	The metal decorative sculptures of the front door and windows	46
3.6.1	Defects of the sculptures	46
3.6.2	Restoration methods	48
3.7	The wooden ceiling	48
3.7.1	Defects	48
3.7.2	Remedies	50
3.8	The Roof as a whole	50

3.8.1	The wooden frame of the roof	51
3.8.1.1	Restoration of the frame	51
3.8.2	The wooden perimeter of the roof plus the metallic gutters	51
3.8.2.1	Remedy method	53
3.8.3	The Roof tiles, battens and the boardings	53
3.8.3.1	Restoration for the battens and boarding	53
3.8.3.2	The Roof tiles Remedy	54
3.9	The electric installation and telephone utility	55
3.9.1	Changing the installations	55
3.9.2	Additionally: The door Bell switch.	57
3.10	An additional proposed idea for the heating and cooling of the house:	59
3.10.1	The climatic conditions of the house	59
3.10.2	Proposed idea	59
Chapter 4:	Materials to be used for the Restoration process	61
4.1	For the walls	62
4.1.1	external	62
4.1.2	internal	62
4.2	For the timber	63
4.2.1	external	63
4.2.2	internal	64
4.3	For the floor	64

4.4	For the metallic sculptures	64
4.5	For the ceiling	64
4.6	The wooden frame	65
4.7	For the roof tiles	65
4.8	For the Door Bell	65
4.9	The electric installation	65
Chapter 5: Ideas and Regulations for the Restoration of a house		67
5.1	General information	69
5.2	The procedure for the Restoration process	69
5.3	Economic incentives for preservation of listed buildings (LAW 68 (1) 92)	70
Chapter 6: A photographic review "The Revival of Nicosia"		74
The conclusions		84
Selected Bibliography		87
The ending		90
