ELECTRICAL ENGINEERING DEPARTMENT

DIPLOMA PROJECT

DESIGN OF THE ELECTRICAL INSTULLATION  
OF A HOTEL APARTMENTS

E / 1071

BY: IOANNIS GEORGIUO

JUNE 1997

**Project Report Submitted By:**

**Ioannis Georgiou  
Higher Technical Institute**

**In partial satisfaction of the conditions for the award of the Diploma  
of the Technical Engineering in Electrical Engineering of the Higher  
Technical Institute , Cyprus.**

***Design of the Electrical Installation of a  
Hotel Apartments.***

**Project Supervisor: Mr A.Georgiou  
Type of project: Individual**

**June , 1997**

## CONTENTS

Abstract  
Symbol list  
Introduction

### Chapter 1 Illumination Design

1.1 Introduction	1
1.2 Definitions and units used	1
1.3 Light sources	2
1.4 Methods of illumination calculations	3
1.5 Typical illumination calculations	5

### Chapter 2 Earthing System

2.1 Introduction	11
2.2 Direct contact	11
2.3 Indirect contact	12
2.4 Earthing arrangements relating to the various system	12

### Chapter 3 Lighting Design

3.1 General	14
3.2 Procedure	15
3.3 Calculation for a typical lighting circuit	18
3.4 The staircase switch	21
3.5 Lighting design results	23

### Chapter 4 Power Design

4.1 General	25
4.2 Socket outlets	26
4.3 Design calculations for a typical ring circuit	26
4.4 Socket outlets results	30
4.5 Fixed appliances	32
4.6 Calculation for a typical cooker unit circuit	32
4.7 Calculation for a typical air condition unit circuit	35
4.8 Calculation for a typical refrigerator unit circuit	37
4.9 Fixed appliances results	40
4.10 Lift motor specification	41
4.11 Lift motor calculations	42

### Chapter 5 Energy Management System

5.1 Introduction	44
5.2 Methods for achieving energy saving for lighting circuits	44
5.3 Methods for achieving energy saving for air conditioning	45
5.4 Savings from the energy management system	45
5.5 Maximum demand control	45
5.6 Energy saving in hotel apartments	46
5.7 Installation and wiring methods	48

<u>Chapter 6</u> Inspection and Testing	
6.1 Introduction	50
6.2 Visual inspection	50
6.3 Testing	51
6.4 Operation of the residual current protective device	53
6.5 Certification	53
<u>Chapter 7</u> Fire Alarm System Design	
7.1 Introduction	57
7.2 Manual fire alarm systems	57
7.3 Automatic fire alarm systems	57
7.4 Smoke detectors	58
7.5 Heat detectors	59
7.6 Flame detectors	59
7.7 Zoning	60
7.8 Control panel	61
7.9 Power supply	61
7.10 Wiring	61
7.11 Fire alarm results	61
<u>Chapter 8</u> Supply Cables	
8.1 General	63
8.2 Diversity calculations	63
8.3 Calculation of the main feeding cable D.B 01.MAIN	65
8.4 Calculation for a typical distribution board cable	66
8.5 Results for the supply cables	69
<u>Chapter 9</u> Balancing	
9.1 Table A for balancing	71
9.2 Table B for balancing	72
9.3 Balancing calculations	73
9.4 Fault level calculations	73
<u>Chapter 10</u> Telephone Distribution Design	
10.1 Introduction	79
10.2 General	79
10.3 Complete design submitted to C.Y.T.A	80
10.4 Preliminary considerations	80
10.5 Earthing	81
10.6 Electronic Private Automatic Branch Exchange	81
10.7 Key systems	82
10.8 Procedure to be followed to plan an internal wiring	82
10.9 Information obtained from the conduit and wiring diagrams	83
10.10 Information obtained from the list of connections	83

<u>Chapter 11</u> Lightning Protection System Design	
11.1 The characteristics of lightning	88
11.2 Effects of lightning strike	89
11.3 Need of protection	90
11.4 Calculation of the overall risk factor	91
11.5 Component of lightning protection system	92

<u>Chapter 12</u> Costing	
12.1 Introduction	94
12.2 Methods of estimating	94
12.3 Labour cost	95
12.4 Cost analysis table	96
12.5 Costing results	98

Conclusions  
Appendices

## ABSTRACT

This project deals with the design of the electrical and telecommunication services and also some specialist subjects of a Hotel apartments .The project work includes specifications and tender drawing as well as typical calculations of the design carried out.

The whole design is made according to the relevant regulations for each system.
