

**DEVELOPMENT OF THE SOFTWARE
OF A COMPUTER AIDED MUSICAL
INSTRUMENT LEARNING SYSTEM**

Project Number :E.927

By: MARCOU MARCOS

Project
Supervisor: Dr CC Marouchos

IN PARTIAL FULLFILLMENT OF THE REQUIRMENTS FOR THE AWARD OF
THE DIPLOMA OF THE TECHNICIAN ENGINEER IN ELECTRICAL
ENGINEERING

HIGHER TECHNICAL INSTITUTE

NICOSIA, CYPRUS

JUNE 1994

HIGHER TECHNICAL INSTITUTE	PROJECT NO. <i>2311</i>
----------------------------------	----------------------------

SUMMARY

In our days Computers became an integral part of our life. We use computers in all life applications ,in business, in schools even in our houses as game machines. This program was written to become one of all these applications. To help anyone who do not have previous knowledge to learn how to play every musical piece in a guitar. You can learn how to play the songs melody or even the chords of the song.

CONTENTS

Acknowledgments	1
Summary	2
Introduction	3
CHAPTER 1	
RULES FOR TRANSLATING A MUSICAL PIECE INTO A BASIC PROGRAM	4
1.1 The necessity of translation of the musical piece into codes	4
1.2 Translating the melody of a musical piece into a BASIC program	4
1.3 Translating the chords of a musical piece into a BASIC program	9
CHAPTER 2	
HOW DOES THE PROGRAM WORKS	12
2.1 General explanation	12
2.2 Explanation of the "MELODY" subroutine	13
2.3 explanation of the "CHORDS" subroutine	14
CHAPTER 3	
HARDWARE REQUIRMENTS	16
CHAPTER 4	
CONCLUSIONS	17
APPENDIXES	
APPENDIX A - The program listing	18
APPENDIX B - The musical piece "Pare me"	21
APPENDIX C - The peripheral card diagram	23
