1.Introducing the system

1.1 The System

Welcome to the web design of the Agros Village system. This system has been developed for the fulfilment of the requirement to get the Diploma of the Higher Technical Institute during the year 2005.

'Web design of the Agros Village' is a package that will help you to learn about the history and the tradition , about the hotel the sport centre , the park and the entertainment of the Agros Village but also, to admire the beautiful landscapes of the Village. It use all kind of multimedia resources like videos, photographs, sound effects, animation, text that will make it easier, more understandable and more user-friendly.

1.2 About this manual

The manual gives in full detail and through illustration directions on how the web design can be used. The user must definitely refer to the part of the manual stating the requirements for the users computer system and the instructions on how to install.
