MASTER in Computer Science
Lecturer in Computer Department
of H.T.I.

External Assessor : Mr. Antreas Gerou
BSC in Computer Science
Systems Analyst in
Cyprus Airways.

Type of project : Individual.

June, 1994.

1. Introduction :

The computerized Master Mind game is a computerized version of the regular Master Mind game. The same rules and regulations exist and at this version with difference that computer makes its appearance and some more options to play the game. At this computerized version one player can play as well as two players. The playing board can vary depending on user choice. User can play having from three to seven secret colors. It is user friendly and supports online help and interactive messages to user.

Generally it can be played by anyone that know how to play master mind game or anyone that can read the instructions of the game.
