

PROJECT REPORT

3062

"SEQUENCE CONTROL USING PROGRAMMABLE CONTROLLERS"

SUBMITTED BY :

IORDANOU CH. APHRODITE

In partial fulfilment of the requirements of the award of the Diploma of the Technician Engineer in Electrical Engineering of the Higher Technical Institute CYPRUS.

PROJECT SUPERVISOR : Mr E. Michael BSc, MSc lecturer in Electrical Engineering, H.T.I.

JUNE - 1992

H.T.I

SUMMARY

TITLE: "Sequence control using Programmable Controllers"

AUTHOR: Iordanou Ch. Aphrodite

The report investigates the programming capabilities of a "ladder language". It also examines the characteristics and capabilities of Programmable Controllers. Then an application programme using the Programmable Controller for a sequence control process is developed. Finally, the program analysis, costing and comparison with conventional methods are given.

The application program is based on the Allen-Bradley SLC 500 Programmable Controller's instruction techniques and the PLC of the H.T.I.

The unique feature of this report is that it does not depend on the reader's background knowledge on PLCs. It was tried to use simple technical language. Illustrating diagrams and pictures were also used in order to be both interesting to read and useful.

CONTENTS

	<u>PAGES</u>
Acknowledgements	2
Summary	3
Introduction	4
<u>CHAPTER 1 : Introduction to PLC</u>	5
1.0 Introduction	6
1.1 Definition	6
1.2 Historical Development	6
1.3 Comparison of Programmable Controller with other control methods	7
<u>CHAPTER 2 : System description and Internal operation</u>	12
2.0 Introduction	13
2.1 Major section of a Programmable Controller	13
2.2 The Central Processing Unit (CPU)	14
2.3 Input/Output modules	18
2.4 Power Supplies	23
2.5 Programming Terminal/Monitoring device	24
2.6 Printers	26
2.7 Program Recording Devices-Tape or Disk	27
<u>CHAPTER 3 : Ladder Diagram Language</u>	29
3.0 Introduction	30
3.1 Programming languages in general	30
3.2 Ladder language	32
3.3 Programming symbols/instructions	32
3.4 Logical continuity	33
3.5 Memory organisation and addressing	34
<u>CHAPTER 4 : Basic PLC functions</u>	39
4.0 Introduction	40
4.1 Relay logic (Bit) instructions	40
4.2 Timer and Counter instructions	43
4.3 I/O Update instructions	47
4.4 Comparison instructions	48

4.5 Compute and Math instructions	48
4.6 Move and Logical instructions	49
4.7 File Copy and File Fill instructions	49
4.8 Bit Shift instructions	49
4.9 Sequencer instructions	50
4.10 Control instructions	50
4.11 Other advance functions	51
<u>CHAPTER 5 : Application case study</u>	52
5.0 Introduction	53
5.1 Program planning steps	53
<u>CHAPTER 6 : Program analysis</u>	79
6.0 Introduction	80
6.1 Explanation of the PLC program	80
6.2 The control panel	85
<u>CHAPTER 7 : Costing</u>	87
7.0 Introduction	88
7.1 Cost analysis	88
7.2 Selection of the CPU-User memory	89
7.3 Costing estimation of the PLC system used	90
7.4 Comparison with the conventional methods costs	91
Conclusions	92
<u>APPENDICES:</u>	95
<u>APPENDIX 1 : SLC 500 specifications</u>	96
<u>APPENDIX 2 : Configuring and programming the PLC</u>	115
<u>APPENDIX 3 : HHT Error messages</u>	130
