

INDUSTRIAL WASTE CONTROL

by

Kyriaki Christofi

Project Report

Submitted to

the Department of Civil Engineering

of the Higher Technical Institute

Nicosia Cyprus

in partial fulfillment of the requirements

for the diploma of

TECHNICIAN ENGINEER

in

CIVIL ENGINEERING

June 1994

ACKNOWLEDGEMENTS

I would like to express my deep thanks to my project supervisor Mr N. Kathijote and to the Ministry of Commerce and Industry for their valuable guidance and assistance given throughout the project period.

ABSTRACT

This project deals with industrial waste control.

The project work is divided into four parts.

In the first part identification of industrial wastes.

The second part deals with their effect on the environment.

The third part covers the present methods used overseas for handling such wastes.

The fourth part deals with a specific problem of disposing industrial wastes and design a disposal site for this waste.

INTRODUCTION

1

PART I: IDENTIFYING THE PROBLEMS RECORDING INDUSTRIAL WASTES

1.1:	DEFINITIONS	2
1.2:	CATEGORIES OF INDUSTRIAL WASTE	3
1.3:	HAZARDOUS WASTES	3
1.4:	SOLID WASTES	4
1.5:	TOXIC WASTES	5

PART II: EFFECTS OF POLLUTION ON THE ENVIRONMENT

CHAPTER I: AIR POLLUTION

1.1:	TYPE OF POLLUTANTS	18
1.1.1:	GASEOUS POLLUTANTS	18
1.1.2:	PARTICULATE POLLUTANTS	19
1.2:	AIR POLLUTION FROM A LANDFILL	19

CHAPTER II: WATER POLLUTION

1.0:	PHYSICAL PARAMETERS	21
1.1:	COLOR	21
1.2:	ODOR	21
1.3:	SOLIDS	22
2.0:	CHEMICAL PARAMETERS	23
2.1:	SALINITY	23
2.2:	HARDNESS	24
2.3:	TOXICITY	24
3.0:	BACTERIOLOGICAL PARAMETERS	25

CONTENTS (CONT.)

PART III: METHODS AVAILABLE FOR HANDLING INDUSTRIAL WASTES	
1.0:	GENERAL 26
1.1:	PHYSICAL - CHEMICAL TREATMENT 27
1.2:	COAGULATION AND FLOCCULATION 27
1.2.1:	THE NEED FOR COAGULATION AND FLOCCULATION 27
1.2.2:	PRINCIPLE OF COAGULATION AND FLOCCULATION 28
1.2.3:	COAGULANTS AND COAGULANT AIDS 29
1.2.4:	APPLICATION OF COAGULANT CHEMICALS TO WATER 31
1.3:	OCEAN DISPOSAL 34
1.4:	LAND DISPOSAL OF LIQUID WASTES 35
1.5:	INCINERATION 36
1.5.1:	DESIGN AN INCINERATOR 37
1.5.2:	TYPES OF INCINERATORS 38
1.6:	GAS CLEANING EQUIPMENT 45
1.7:	INDUSTRIAL LANDFILL 46
1.7.1:	SUCCESSFUL LANDFILL 46
1.7.2:	DESIGNING A LANDFILL 47
1.7.3:	SITE SELECTION 51
1.7.4:	LANDFILLING METHODS AND OPERATIONS 51
1.7.5:	CHEMICAL LANDFILL 55
1.7.6:	SEALING THE LANDFILL 57
1.7.7:	LEACHATE IN LANDFILLS 58
1.7.8:	CLOSING OF THE LANDFILL 58
PART IV: THE PROBLEM OF DISPOSAL OF INDUSTRIAL WASTES IN CYPRUS 64
