

DESIGN OF A HIGHWAY ROAD

Project Report Submitted by

FERDINAND JOHN

in part satisfaction of the award of
Diploma of Technician Engineer in Civil
Engineering of the Higher Technical
Institute, Cyprus.

Project Supervisor: Mr. A. Kkolos

Lecturer of Civil
Engineering Dept.,
HTI.

External Assessor : Dr. A.Papasozomenos
Executive Engineer I
in PWD.

Type of Project: Individaul

Group

June, 1985

HIGHER TECHNICAL INSTITUTE	PROJECT NO 919
----------------------------------	-------------------

A B S T R A C T

This project was prepared and studied in collaboration with the Governor's Beach Interchange which was being designed to serve the Governor's Beach at Limassol. It consists of two volumes. Volume 1 deals with the general design considerations which must be taken into account. This volume also gives the earthwork measurements and clearing and grubbing measurements for the Governor's Beach Interchange. Volume 2 shows the drawings which were prepared for the interchange.

Other measurements such as the horizontal and vertical alignments measurements together with a number of cross-section drawings have been left out of this project.
