Mechanics of Backgammon

Develop a Computer Backgammon Player

Backgammon is a traditional game of luck and skill. The requirements of the project is to analyze backgammon playing and develop computer techniques which will be able to play the game against the human, or even against another computer player.

This can be done by evaluating every single move depending on the current board situation, and then choose the best move. Another way is to collect several backgammon games, find rules and common patterns in them and then use AI techniques (such as Neural Networks) in order to learn from these. A combination of these methods is another option. The objective of this project is to develop an algorithm using Neural Networks, or a heuristic evaluation method.

This project is a chance to finally defeat my father in Backgammon.

Mechanics of Backgammon.....	3
Develop a Computer Backgammon Player	3
Phase 1:.....	4
Phase 1. Investigation Phase:.....	4
1.2 Initial Investigation	4
1.1.2 Introduction of the backgammon game.	5
1.1.3 Objectives of the Backgammon Game	6
1.1.4 Rules of the Backgammon Game	6
1.1.5 Objectives and requirements of the project.....	7
1.1.6 Development tools to be used.	7
1.2 Feasibility Study:	8
1.2.1 Financial feasibility.....	8
1.2.2 Schedule feasibility.....	8
1.2.3 Technical Feasibility	9
1.2.4 Operational Feasibility	9
1.2.5 Human Factors Feasibility	9
Phase 2: Analysis & General Design.....	10
2.1 Existing system review.....	10
2.2 New System Design	12
2.2.1 Processing.....	12
2.2.2 Input and output of the system.....	12
2.2.3 Security and control.....	13
2.3 Implementation and Installation Phase.....	14
2.3.1 Preliminary Detail Design and Implementation Plan..	14
2.3.2 Preliminary System Test Plan	14
2.3.3 User Training Outline.....	14
Phase 3 Detail Design and Implementation Phase	15
3.1 Technical Design	15
3.2 Test Specification and Planning	15
3.3 Programming and Testing	16
3.4 System Testing	16
Phase 4: Installation Phase.....	17
4.1 System Installation:	17
Phase 5: Review Phase	18
5.1 Development Recap	18
5.2 Post Implementation review	18
Conclusion	19
Appendix A	21
Appendix B	23
Appendix C	25
Appendix D	40
