CHAPTER 1

1.1 INTRODUCTION

The "**HTI Time-Table System**" is a tailor made system, especially designed to satisfy the needs of the staff involved in the generation of the HTI Time-Table. It is a powerful tool that when used correctly, generates the Institute's Time-Table in less time and with less effort.

This system keeps all the necessary information concerning all departments, classes, rooms, lecturers, and subjects. Updating of these information is also available. Other information that you are requested to enter in order for the system to run, is the lecturers' loading.

After entering all the information into the computer, you can produce the Time-Table by using the Tool offered. At every step taken you will be warned for any errors that may occur. There is on-line help throughout the whole system.

A great variety of reports can be generated after the Time-Table is finished. A great variety of useful utilities are offered for your convenience.

Now, all you have to do is to run the "**HTI Time-Table System**" and find out by yourself how easy is to generate the Time-Table by using this program. Throughout the whole procedure you can refer to this manual for assistance.
