1. Introduction:

The computerized Backgammon game is a computerized version of the regular Backgammon game. It is played in the same manner as the normal Backgammon game with the difference that it uses the computer elements. It also provides the ability for a single player with the computer as the opponent.

It is a very pleasant game that provides good entertainment. It is very user friendly and can be used very easily, even by small children. It supports on-line help and interactive messages to the user, so it can be used by anyone who is able to read the instructions of this game.

Thank you for using this game. For more detailed information you can phone to :

(04) - 342606
