SUMMARY

ROAD SAFETY

by Tranda Elpiniki

The purpose of my study on the subject "Road Safety" is to arouse the concern of all the people involved in order to achieve traffic orderliness and safety.

The prevention of accidents must be the concern of everyone of us and the motto: "No more blood for the asphalt road monster", should become our common objective.

For that reason, through this project, some solutions are given, and preventive measures are suggested so the accidents to be reduced.

Basis of the examination was Cyprus but various studies and rules such as highway lighting, sight distances, etc. can be found in other countries also, such as G. Britain.

The project started with police statistics for Cyprus, analysed the last two years (1994 - 1995)

Then some reference was made on road geometry, as a factor leading to safety problems.

Then, the project proceeded with introducing measures for the reduction of fatal and serious accidents.

Also, some measures for enlightenment of the people were introduced, for reducing the number of traffic accidents. All these measures were suggested for the better prevention of accidents.

Contents

	Page
Summary	i
Introduction	ii
Chapter 1 Accident statistics	1
1.0 General reports about fatal and serious traffic accidents	2
1.1 Factors contributing to the cause of accidents	2
1.2 Basic factors	3
1.2.1 The human factor	3
1.2.2 The "Road Network"	3
1.2.3 "The means of transport"	3
1.3 Accident analysis	4
1.3.1 Accident detailed analysis	5
1.3.2 Accident district	6
1.4 Victim analysis	7
1.4.1 Victim district analysis	8
1.5 Accidents frequency	9
1.6 Killed persons	10
1.6.1 Months	11
1.6.2 Days	11
1.6.3 Light conditions	11
1.6.4 Hours	12
1.7 Motorcyclists	13
1.8 Fatalities of motorcyclists/bicyclists for '95	14
1.9 Safety belts	14
2.0 Drivers due to their nationality	14
2.1 Cost of road traffic accidents	15
2.2 Causes according to frequency	16
2.3 Causes according to severity	16

Chapter 2	Safety as a factor in the geometric design of roads	17
2.0	Geometric Design	18
2.1	Features of a roadway	18
2.2	Design speed	18
2.2.1	Rural roads	19
2.2.2	Urban roads	19
2.3	Design for capacity	19
2.4	Prevailing road conditions	20
2.5	At - grade intersections	21
2.5.1	Signalised intersections	23
2.6	Traffic signals versus roundabout	24
2.7	Sight distances	25
2.7.1	Stopping sight distance	25
2.7.2	Perception time	26
2.7.3	Braking distance	27
2.7.4	Friction factor	28
2.7.5	Passing sight distance	28
2.8	Horizontal curvature	29
2.9	Vertical alignment	29
2.9.1	Cross - section elements	29
2.9.1.1	Traffic lanes	29
2.9.1.2	Shoulders	31
2.9.1.3	Camber	32
2.9.1.4	Side - slopes	32
2.9.2	Intersections	33
2.9.2.1	Intersections at grade	33
2.9.2.1.1	Non - channelized intersections	33
2.9.2.1.2	Chanelized intersections	35
2.9.2.1.3	Roundabout intersections	36
2.9.2.2	Grade - separated	38
2.9.3	Interchanges	38
2.9.4	Highway lighting	43

2.9.4.1 Lamps	43
Chapter 3 Short term, middle term and long term measures for the reduction of fatal and serious accidents	44
3.0 Introduction	45
3.1 The human factor	45
3.1.1 Systematic policing of the highways to assure strict compliance with traffic laws and regulations by drivers	45
3.1.2 Strict enforcement of the provisions of the ALCOTEST legislation	46
3.1.3 Broadening of the provisions of the law for safety belts	47
3.2 Traffic network	49
3.2.1 Marking/Sign posting of the Traffic Network	49
3.2.2 Improvement of the Geometric characteristics of roads	49
3.2.3 Non - slippery surface	50
3.2.4 Problematic spots along	50
3.2.5 Nicosia - Limassol Highway	50
3.2.6 Lighting and maintenance of traffic network	50
3.3 Means of transportation	50
Chapter 4 Preventive and enlightenment measures for reducing the number of traffic accidents	52
4.1 Enlightenment of Juniors	53
4.2 Enlightenment of Adults	54
4.3 Enlightenment through the family	54
4.4 Educating the driver - Defensive driving	55
4.5 Special preventive legislation	56
4.6 Results on a survey for the reduction of traffic accidents by 15% during 1996	57
4.6.1 Overall results of the survey	58
4.6.2 Recommended measures	58

Conclusions	59
