

MANUFACTURE OF A PYROTECHNIC GUILLOTINE

by

ELIADES ADONIS

Project Report

submitted to

the Department of Mechanical Engineering

of the Higher Technical Institute

Nicosia Cyprus

in partial fulfillment of the requirements

for the diploma of

TECHNICIAN ENGINEER

in

MECHANICAL ENGINEERING

JUNE 1990

Project Supervisor: Dr. L G Lazari.

HIGHER TECHNICAL INSTITUTE	PROJECT NO. 1704
----------------------------------	-------------------------

ABSTRACT.

This project deals with the modifications and manufacturing processes of a Pyrotechnic Guillotine designed to sever wire ropes.

Additionally, the Pyrotechnic Guillotine will be tested to evaluate its cutting capabilities on a variety of wire ropes by using different cartridge loadings.
