1. INTRODUCTION.

The Medical Fund Administration System operates in a user friendly environment and offers useful facilities that are easy to use and save time. By using the window environment the user has the best control of the data.

Using the system is very simple, even if the user has not any previous experience with computers. The On-Line Help and the User manual will make it more easy for the user to operate the system.

Everything about the operations of the system and a step by step quittance is explained here.
