1. INTRODUCTION

The Neuromuscular Disorders Information System operates in a user friendly environment and also offers the user extra features for security and presentability. It is designed for users with no previous experience in computers. Its friendly menus and messages guide the user through the system. The on-line help is an extra feature that provides further explanation on the spot.

You must refer to this manual every time you have some difficulty in operating the system. All the system operations are explained in great detail in this User Guide. Also refer to the bottom of the screen where messages will appear when something goes wrong.
