Submitted to

the Department of Civil Engineering

of the Higher Technical Institute

Nicosia Cyprus

in partial fulfillment of the requirements

for the diploma of

TECHNICIAN ENGINEER

in

CIVIL ENGINEERING

JUNE 1998

ACKNOWLEDGEMENT

My final year project made me realise how interesting and exciting Civil Engineering can be. There are some people that help me to make the accomplishment of my project possible.

Firstly I would like to express my warm thanks to my project supervisor Mr Andreas Kkolos for his guidance throughout my project progress but also for his patience.

Very warm thanks to M.D.A. Quantity Surveyors for the vital information that provide me.
