## 1. INTRODUCING THE SYSTEM

Firstly, we would like to thank you for using our system. This system is a Multimedia system and it was designed for the Cultural Services of the Ministry of Education and Culture. It is involved with the Cypriot Artists (Painters) of the State Gallery of Contemporary Cypriot Art and it was designed to inform Cypriot people, as well as tourists that visit Cyprus, about Art in Cyprus. It is very easy for everyone to use this tool, children and adults.

In this Multimedia system, there are included several photos, sounds and text. Each artist has a separate book, in which a detailed biography is included, as well as critics from the newspapers about his work, samples of his work, and also catalogs, invitations and price lists from his exhibitions.

In addition to this, another book exists which includes all the necessary information about the Cultural Services, containing many pictures and text. Furthermore, you can find many information about the State Gallery of Contemporary Cypriot Art.
