BUILDING ORIENTATION EFFECTS
ON ITS THERMAL LOAD

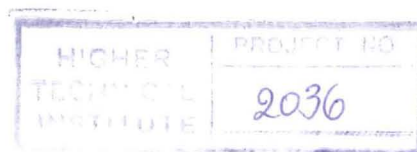

by

PAPACONSTANTINOU SOPHOCLES

Project Report
Submitted to
the Department of Mechanical Engineering
of the Higher Technical Institute
Nicosia - Cyprus
in Partial Fulfillment of the Requirements
for the Diploma of

TECHNICIAN ENGINEER
in
MECHANICAL ENGINEERING

June 1992

ACKNOWLEDGEMENTS

I would like to express my sincere thanks and appreciation for the help and guidance to me throughout this project, by my project supervisor Mr. Th. Symeou, who was always most eager to me, and gave his valuable advice and comments.

I would also like to express my sincere thanks and appreciation to any other person who in any way facilitated my way through the project.

Finally, I feel indebted to Miss Nikki Harpas who has kindly undertaken the typing of this manuscript.

BUILDING ORIENTATION EFFECTS
ON ITS THERMAL LOAD

PAPACONSTANTINOU SOPHOCLES

SUMMARY

The object of this project is to investigate building orientation effects on its thermal load.

First, some general theory about solar radiation was written down. Afterwards thermal load calculations is proved. After showing how the program is used the appropriate results are taken. Graphs, comments and the finally conclusions close the project.

SUMMARY

INTRODUCTION

CHAPTER 1 - SOLAR RADIATION

| | | |
|-----|--|---|
| 1.1 | The Nature of Solar Energy..... | 1 |
| 1.2 | The Origin of Solar Energy..... | 2 |
| 1.3 | Solar Constant..... | 3 |
| 1.4 | Solar Radiation at the Earths Surface..... | 3 |
| 1.5 | Characteristics of Solar Energy..... | 4 |
| 1.6 | Position of the sun in the Sky..... | 5 |
| 1.7 | Sun Angles..... | 6 |

CHAPTER 2

| | | |
|-----|--|----|
| 2.1 | Calculation of Incident Solar Radiation... | 8 |
| 2.2 | Some Definitions..... | 9 |
| 2.3 | Heat Transmission..... | 13 |
| 2.4 | Derivation of The Overall Coefficient of Heat Transmission..... | 13 |
| 2.5 | Solar Radiation Through Glass Windows.... | 16 |
| 2.6 | Parameters Affecting Solar Radiation Through Glass Windows..... | 16 |
| 2.7 | Shading Information..... | 16 |

CHAPTER 3 - THERMAL LOAD CALCULATIONS

| | | |
|-----|---------------------------------------|----|
| 3.1 | Thermal Load General..... | 18 |
| 3.2 | Wall and Roof Transmission Loads..... | 18 |

| | | |
|-----|-------------------------------|----|
| 3.3 | Glass Transmission Loads..... | 18 |
| 3.4 | Solar Gain Loads..... | 19 |
| 3.5 | Heat Gains Due to People..... | 20 |
| 3.6 | Other Heat Gains..... | 21 |

CHAPTER 4 - HOURLY ANALYSIS PROGRAM

| | | |
|-----|--|----|
| 4.1 | The Need for a Computer Program..... | 22 |
| 4.2 | How the Program is Used..... | 22 |
| 4.3 | Estimation of U Values..... | 24 |
| 4.4 | Space Inputs for My House, Bank (Ground Floor), Bank (Mezzanine), Protopapa House..... | 28 |

CHAPTER 5 - RESULTS - COMMENTS

| | | |
|-----|---|-----|
| 5.1 | Results of Space Peaks for Project..... | 36 |
| 5.2 | Results for my House..... | 37 |
| 5.3 | Comments - My House..... | 60 |
| 5.4 | Results for Bank Ground Floor..... | 62 |
| 5.5 | Results for Bank Mezzanine..... | 85 |
| 5.6 | Comments for the Bank..... | 109 |
| 5.7 | Results for Protopapa House..... | 111 |
| 5.8 | Comments for Protopapa House..... | |

CHAPTER 6

| | | |
|-----|-----------------------|--|
| 6.1 | General Comments..... | |
|-----|-----------------------|--|
