JUNE 1995

INTRODUCTION

This Time Series Analysis and Forecasting Computerised System for Fruits/Vegetables maintains information about the Cypriot Fruits and Vegetables, in the market of foreign countries. It provides forecasting information as well as statistical reports and graphs concerning the prices of the fruits and vegetables.

This system is very easy to use. It is user friendly with messages informing you for all the actions to be taken. You must refer to this manual whenever you are facing difficulties. This manual contains steps for helping you to complete any task of the system provides.
