in

CIVIL ENGINEERING

June 1991

ACKNOWLEDGEMENTS

I would like to express my deepest gratitude to Mr. M. Poullaides for the advise and guidance that he had given to me through this project.

ABSTRACT

The objective of the project is to design a reinforced concrete car showroom suitable for 5 saloon cars, two offices and a toilet and to estimate the structural value of the project.

The design is based on BS8110.

The estimation is based on SMM7.
