BEFORE YOU START

1.1 INTRODUCTION

Welcome to **Operating System Concepts Simulation Package (OSCSP)**, a software specially designed to teach Operating System Concepts in parallel to the ordinary teaching method at H.T.I.

Once you have installed the OSCSP on your hard disk you will be able to use it whenever you want by following the several steps mentioned next the in 'Get Started' section.

Information about the Installation can be found in the 'System Installation' that follows.

Whenever you need some help about a task to perform, or if you have any misunderstandings about the system and want to get clear explanations or instructions, you can refer to the Online Help, which is found in every screen of OSCSP.
