## **User Manual Introduction**

In the user manual the user will be able to see the basic style of the user interface. Also through the user manual the user must be able to learn alone how the system will work and also to see the basics applications of the system. But the basic use for the user manual is to help the user to solve any problem that may face during the system usage.

In the user manual to follow are going to be included:

- User interface
- Common interface between the user and the administrator
- Administrator interface
- Explanation of what each button can do.
- How the form must be filled
- How to install the program and the default username and password
