"A LITERARY SURVEY ON HYBRID CARS"

by

Christodoulos Tsimouris

M/1006

Project report submitted to the
Department of Mechanical Engineering
of the Higher Technical Institute

Nicosia Cyprus

in partial fulfilment of the requirements for the diploma of

TECHNICIAN ENGINEER

in

MECHANICAL ENGINEERING

June 2005

HIGHER TECHNICAL INSTITUTE	PROJECT NO
	3563

SUMMARY

Reading this project someone will understand what is a hybrid car, its advantages and disadvantages. Also the function of a hybrid car and the purpose of introducing this type of technology. It was needed to explain the principles, construction and implementation of different types of hybrid vehicles.

The main location and area of investigation of such a survey was internet, on the other hand books and magazine helped to carry out this reports.

My main target was to focus to the points given by the project supervisor and also to use common language so to be understood by everyone. It must be mention that I found the needed articles, take the good points from these articles, and connect them to have the project. At many chapters you will find my opinion and conclusions.

The main conclusions were that the hybrid technology must be to our mind so to use it; using this technology someone saves the environment and money. Furthermore support of research and development must be provided by the government and other communities.

CONTENTS

	Page
CONTENTS	I
LIST OF FIGURES, BOXES AND TABLES	IV
ACKNOWLEDGMENTS	VI
<u>CHAPTER 1 – INTRODUCTION</u>	1
1.1 AIMS AND OBJECTIVES	1
1.2 AIR POLLUTION	3
1.3 CARBON DIOXIDE EMISSIONS AND GLOBAL WARMING	4
1.4 INCREASING DEPENDENCE ON IMPORTED OIL	5
<u>CHAPTER 2 – EMERGING VEHICLE TECHNOLOGIES</u>	7
2.1 CARBON – BASED FUELS	7
(A) METHANOL	7
(B) COMPRESSED NATURAL GAS (CNG)	7
(C) ETHANOL	8
(D) ALCOHOL FUELS FROM OTHER BIOMASS SOURCES	8
2.2 SUMMING UP THE PROS AND CONST OF CARBON – BASED FUELS	9
<u>CHAPTER 3 – VARIOUS ELECTRIC VEHICLES</u>	10
3.1 INTRODUCTION	10
3.2 BATTERY – POWERED ELECTRIC VEHICLES	10
3.3 EV PROGRAMS IN EUROPE AND JAPAN	11
3.4 STATUS OF BATTERY DEVELOPMENT	13
3.5 ALTERNATIVE TO THE BATTERY: ULTRA CAPACITORS AND FLYWHEELS	13
(A) Ultra Capacitors	14
(B) Flywheels	14
<u>CHAPTER 4 - THE PROBLEM WITH GAS – POWERED CARS</u>	15
4.1 SMALLER ENGINES ARE MORE EFFICIENT	15
4.2 EVOLUTION OF HYBRID	16
4.3 HYBRID EAR	16

	(A) Overview	16
	(B) History	17
4.4	RECENT DEVELOPMENTS	17
4.5	BATTERY TECHNOLOGY	19
4.6	HYBRID TYPES	19
4.7	HOW HYBRID CARS WORK	20
4.8	WHAT MAKES IT A "HYBRID"	20
4.9	HYBRID STRUCTURE	22
4.10	HYBRID COMPONENTS	23
4.11	HYBRID PERFORMANCE	23
4.12	HYBRID EFFICIENCY	24

CHAPTER 5 - A CLOSER LOOK TO AN EXISTING 26
HYBRID CAR

5.1	HYBRID SYSTEM SELECTION FOR MAXIMUM EFFICIENCY	26
5.2	DEFINITION	26
	(A) Series Hybrid System	27
	(B) Parallel Hybrid System	28
	(C) The Combination	28
5.3	IMPROVEMENTS IN FUEL EFFICIENCY	28
5.4	TOYOTA HYBRID SYSTEM	29
5.5	KEY INNOVATION: THE POWER CONTROL UNIT WITH THE BOOST CONVERTER	31
5.6	INCREASING THE POWER OUTPUT	32
5.7	HYBRID TRANSMISSION WITH MOTOR AND GENERATOR	35
	(A) Gear Train	36
	(B) The Generator and the Motor	36
	(C) The Motor	37
	(D) The Generator	38
5.8	THE ENGINE	39
	(A) Selection of the Engine Type and Size	40
	(B) Fuel Efficiency Improvement	41
5.9	THE HYBRID BATTERY	44
5.10	COOLING PERFORMANCE	48
5.11	LIFE CYCLE	49
5.12	THE REGENERATIVE BRAKING SYSTEM	49
	(A) Introduction	49
5.13	ELECTRONICALLY CONTROLLED BRAKING SYSTEM (ECB)	50
	(B) Conclusion	51

CHAPTER 6 - COMMERCIALY AVAILABLE 52
6.1 WHAT'S AVAILABLE NOW? 52

6.2	COMING SOON!	52
	(A) The Honda Insight	53
	(B) The Toyota Prius	56
6.3	HYBRID CAR MAINTENANCE	58
6.4	HYBRID MILEAGE TIPS	58
6.5	WHY BUILD SUCH A COMPLEX CAR?	58
<u>CHAPTER 7 - OVERALL CONCLUSION</u>		60
7.1	SUMMARY AND RECOMMENDATIONS REDUCING	60
7.2	EV PERFORMANCE AND LIFE – CYCLE COST ESTIMATE	60
7.3	ENHANCED SUPPORT OF RESEARCH AND DEVELOPMENT	60
7.4	INFRASTRUCTURE DEVELOPMENT	61
7.5	OTHER MEASURES TO GET ZEVs ON THE ROAD	61
	REFERENCES	62
