SUMMARY

PERSONNEL INFORMATION SYSTEM FOR THE CUSTOMS AND EXCISE DEPARTMENT

EFFIE CHRISTOPHIDOU

The purpose of this system is to fully computerize the activities of the Personnel department of the Customs and Excise department. The existing system is a manual system and was found very slow, inefficient, and inconvenient. For, this reason, a computerized system is prepared for handling all these manual activities.

The new computerized system to be provided will handle the records of 377 employees of the Customs and Excise Department. It cover all functions of a personnel system such as promotions, salary increments, position changes, annual appraisals, leaves of absence, allowances / overtimes, employment history of employees, disciplinary actions, department changes. In addition, history files will keep the records of all employees retiring or leaving the department.

It is believed that the system, when in operation, will overpass all problems currently phased during its manual operations providing in addition a friendly - environment fast access times, efficient, accurate and on - time reports as well as reliability and ease maintenance.
