

**COMPUTERIZED INVENTORY
INFORMATION SYSTEM**

Project Report submitted by

CHARALAMBOUS MARIA

In part satisfaction of the
Award of diploma in Computer
Studies of the Higher Technical
Institute, Cyprus.

Project supervisor : Mrs Pagona Katsouri
BSc Computer Science
and Mathematics,
Lecturer, Computer Studies
Course, HTI, Nicosia.

External Assessor : Mr Thomas Stylianou
Bsc (Hons) Computer Science,
MBSC, Manager of Information
Technology Dpmt, Hellenic
Bank Ltd.

Type of Project : INDIVIDUAL

June - 1994

HIGHER TECHNICAL INSTITUTE	PROJECT NO 2253
----------------------------------	--------------------

INTRODUCTION

The Computerised Inventory Information System was designed and developed in order to satisfy the needs of a small or large warehouse which may hold various types of goods.

The analysis and design of the system was made after an in depth investigation in a number of warehouses used for different applications. Visits to warehouses and interviews to the managers offered a lot of valuable information.

A warehouse, besides the control of the stock that gets in and out of the warehouse, it also deals with keeping accounting books for customers and suppliers of the warehouse.

The software package, Inventory Information System, incorporates the stock control module to accommodate the relevant stock control procedures. Also the system incorporates the basic accounting procedures like invoicing and keeping the customers' and suppliers' ledgers or other procedures and ledgers that are involved in the stock control maintenance.

The software package also incorporates a database maintenance module of relevant supplies to the ones that the warehouse has and exist in the market along with their pictures, if applicable.

TABLE OF CONTENTS

	PAGE
ACKNOWLEDGEMENTS	
INTRODUCTION	1
1. INVESTIGATION PHASE	2
1.1 INITIAL INVESTIGATION	2
1.1.1 INFORMATION ABOUT THE WAREHOUSE	
1.1.2 INFORMATION ABOUT THE PEOPLE	
1.1.3 INFORMATION ABOUT THE ENVIRONMENT	
1.1.4 INFORMATION ABOUT THE WORK	
1.1.5 EXISTING MANUAL OPERATIONS	
1.1.6 PROBLEMS OF THE EXISTING SYSTEM	
1.1.7 RECOMMENDATIONS	
1.1.8 CONCLUSION - SOLUTION	
1.2 FEASIBILITY STUDY	8
1.2.1 PURPOSE AND SCOPE OF THE SYSTEM	
1.2.2 OPERATIONAL FEASIBILITY	
1.2.3 HUMAN FACTORS FEASIBILITY	
1.2.4 TECHNICAL FEASIBILITY	
1.2.5 SCHEDULE FEASIBILITY	
1.2.6 FINANCIAL FEASIBILITY	
1.2.7 PROJECT FEASIBILITY	
2. ANALYSIS AND GENERAL DESIGN PHASE	14
2.1 EXISTING SYSTEM REVIEW	14
2.2 NEW SYSTEM REQUIREMENTS	15
2.3 NEW SYSTEM DESIGN	20
2.4 IMPLEMENTATION AND INSTALLATION PLANNING	23
3. DETAILED DESIGN AND IMPLEMENTATION PHASE	25
3.1 TECHNICAL DESIGN.....	25
4. CONCLUSION.....	27
5. APPENDICES	28
APPENDIX A	28
APPENDIX B	31
APPENDIX C	92
APPENDIX D	111
